PROFESSIONAL SUMMARY

Computer Science graduate with experience in artificial intelligence research and development. Interested in understanding how people perceive, understand, and trust AI systems, and how these insights can guide the design of more transparent and responsible AI. Particularly interested in how AI communicates its capabilities, uncertainty, and limitations to support healthy, informed use and prevent overreliance, emotional dependency, and misleading interactions.

EDUCATION

Herald College Kathmandu 2022–2025
BSc (Hons) in Computer Science | Affiliated with the University of Wolverhampton, UK
76.44% | First Class Honours

PROFESSIONAL EXPERIENCE

Kathmandu Metropolitan City May–June 2025
AI Instructor

- Designed and delivered 300+ hours of applied AI and Python instruction to 75 students across Kathmandu Metropolitan City schools.
- Developed hands-on labs in supervised learning, exploratory data analysis, and LLM API integration; 92% of students completed capstone projects.

Scala Technologies, Kathmandu September 2024–February 2025
AI/ML Engineer Intern

- Developed a brain tumour segmentation pipeline using DenseNet, ResNet, and attention mechanisms on the BraTS benchmark, achieving Dice scores of 92% on 2D axial and 97% on 3D volumetric data.
- Engineered a tag-based point-of-interest recommendation and route-optimisation system using Dijkstra's and A* algorithms.
- Deployed the inference pipeline using Docker, Azure Container Registry, and GitHub Actions CI/CD, reducing deployment time from three hours to two hours.

RESEARCH EXPERIENCE

Nepal Research & Collaboration Center (NRCC), Kathmandu June–September 2024
Research Trainee

- Conducted a structured literature review of 40+ papers on deep-learning architectures for medical computer vision.
- Co-reviewed a paper on deep learning and computer vision in the medical domain under a PhD candidate from the University of South Dakota, contributing to the gap analysis and methodology critique sections.

Preprints

Pant, P., Sitaula, H., Sakhakarmy, M., & Newpane, S. (2026). *Adapting LLM-SC to Living Sacred Heritage: Domain-Specific Extraction, Semantic Networks and Human Evaluation on Pashupatinath Temple Reviews.* arXiv:2610.35685
First-author preprint, posted 26 October 2026. Journal submission: Applied Sciences (MDPI) *— awaiting editorial decision.*

HONORS AND AWARDS

GIBL Hackathon 2026 | Research paper selected for the onsite final round, Park Village Resort, Kathmandu (May 2026).
Mahatma Gandhi Scholarship Scheme (2018) | Awarded by the Embassy of India, Government of India, for high-school studies.

SKILLS

Programming: Python, SQL
Machine Learning & Deep Learning: PyTorch, TensorFlow, Scikit-learn, OpenCV
NLP & LLMs: QLoRA, LangChain, RAG
MLOps & Cloud: Docker, Azure, GitHub Actions, MLflow, DVC
